

Spyglass MTG's AI Navigator

Your Framework for Successful Agentic AI

What is Spyglass AI Navigator?

Spyglass's AI Navigator Framework offers a comprehensive set of methodologies, tools, and code accelerators designed to give you a "starter kit" edge in developing AI solutions more quickly and effectively. **Navigator aligns with your organization's current stage in the AI Journey**—covering everything from strategy and implementation to governance and continuous support—while guaranteeing **security, compliance, and measurable returns** on investment.

Pro Tip: Responsible AI is about empowering your team to do their best work, faster and smarter, in a secure and well-governed way – not replacing jobs.

Whether you're beginning your AI journey or expanding complex projects, the AI Navigator Framework guides you in choosing the appropriate technologies for today while establishing a secure and scalable base for the future. Utilizing Spyglass's proprietary accelerators such as [AI GENIE](#) and [Fabric LOOM](#), the Navigator Framework is more than a simple checklist—it serves as a strategic launchpad aimed at **delivering genuine business value by functioning as your compass through the intricate AI landscape.**

Accelerate your AI Journey:

Navigator accelerates the end-to-end journey, meeting you where you are.

AI Navigator: Process, Tools & Code Accelerators

Our Framework combines your **Business Strategy** with our **Technical Expertise**, **Business Processes**, and **Proprietary Tools & Accelerators** to speed up your AI journey. AI Navigator organizes AI transformation into three main tracks: Business & AI Journey to Value, Data & AI Foundations, and AI Delivery. This method ensures that AI initiatives are aligned with business goals, established on a solid foundation, and designed for scalability.

Pro Tip: AI is here to stay. Focus less on *if* you should adopt AI, and more on *how* to utilize it responsibly, effectively, and strategically.

Benefits at a Glance

At a high level, **AI Navigator helps organizations unlock real business impact through AI**. Across its three tracks—**Strategy**, **Foundations**, and **Delivery**—Navigator provides:

- **Business Alignment & Impact Focus:** Don't fall into the trap of AI for AI's sake. Navigator aligns AI initiatives with strategic business goals, prioritizes high-impact use cases, and **delivers measurable ROI**.
- **Accelerated Innovation:** Leverage our proven process to **accelerate your time to market by up to 50%**.
- **Cost Savings:** Deploy AI in the most cost-effective way utilizing our process and accelerators – **saving up to 60% of project cost** compared to building from scratch.
- **Governance & Compliance:** Embed **responsible AI practices, robust data governance, and security controls** from day one, ensuring compliance and ethical AI deployment.
- **Empowerment, Not Replacement:** Focus on making teams more effective, enabling people to work smarter and faster, **not replacing jobs**.

AI Use Cases by Industry

Spyglass AI Navigator is more than a framework—it's a proven catalyst for transformation across industries. Through targeted engagements and scalable delivery models, **our clients have unlocked measurable value in sectors ranging from healthcare and finance to manufacturing, higher education, retail, legal, and beyond**—empowering organizations to solve real-world challenges with AI-driven solutions.
