

FABRIC IN 45 DAYS

Build a Governed Data Platform in six weeks

Turn fragmented data into a secure, scalable Microsoft Fabric platform built around a real business priority. Spyglass Fabric in 45 combines proven architecture, hands-on engineering, governance, security, and team enablement in one focused engagement. The result is a governed, scalable foundation your organization can own, extend, and use to accelerate analytics, reporting, data science, and AI initiatives.

FROM DATA ESTATE TO WORKING PLATFORM SIX WEEKS. THREE FOCUSED SPRINTS.

WEEKS 1-2

Design

Data model, analytical solution and success criteria agreed.

WEEKS 3-4

Accelerate with LOOM

Pipelines generated and deployed; code in your repository.

WEEKS 5-6

Optimize & Enable

Performance tuned, documentation delivered, team trained and handed over.

A REUSABLE TOOLKIT

- Fabric LOOM accelerator
- Governance-first adoption framework
- Solution design templates
- Planning and delivery checklists
- Practical development practices
- Proven architecture design patterns
- Capacity assessment and planning tools
- Security and compliance checklists
- Performance management checklist
- Fabric solution delivery templates

45 DAYS

to production-grade Fabric Platform

>\$200K

of engineering value included through LOOM

2-10X

faster development ROI on data delivery

START WITH A PROVEN FOUNDATION. BUILD FOR WHAT COMES NEXT.

WHAT'S INCLUDED

FABRIC IN 45 DAYS

OUR SOLUTION BRINGS TOGETHER THE SIX DISCIPLINES
REQUIRED TO ESTABLISH A SECURE DATA PLATFORM

Governance

Tenant baseline and policy,
set before sprawl.

Security

Workspace and data access
designed by role.

Data Integration

Metadata-driven pipelines
from any source.

Architecture

Best-practice medallion
lakehouse, AI-ready.

Enablement

Hands-on skilling, recorded
sessions, 1-page SOPs.

Operations

Monitoring, data quality and
recovery built in.

Governance and security are designed from the start, not as an afterthought.

Your Team Brings

- Business priorities and data owners
- Source system knowledge
- Engineers who learn by building

Spyglass Brings

- Fabric architects and data engineers
- LOOM accelerator and delivery toolkit
- Governance and adoption facilitation

SHARED OUTCOMES

A MUTUAL
SUCCESS PLAN,
A JOINT
BACKLOG,
DOCUMENTED
DECISIONS.

ARCHITECTURE: WE BUILD WITH YOUR TEAM OWNERSHIP TRANSFERS AS THE PLATFORM GROWS

Sources

Cloud, on-premises,
applications, files, and
streams

Bronze

Raw ingestion
and historical
data

Silver

Cleaned, validated,
and standardized
data

Gold

Curated data and
business-level
models

Consumption

Power BI, analytics,
data science and AI

The same proven architecture adapted to your priorities, systems, data, and operating requirements.

Microsoft

PERSPECTIVE

“

Spyglass MTG has been a key partner in helping us advance our Data & AI initiatives. Their accelerators— Fabric LOOM and AI GENIE—have been instrumental in driving faster adoption and delivering real value across critical domains like data architecture, AI enablement, governance, and security. Their deep expertise and ability to operationalize ideal AI platforms make them a standout partner. I highly recommend working with Spyglass MTG to any Microsoft team looking to scale innovation with confidence.

- BILL CAMPMAN

Sr. Director for Cloud & AI Solutions

SPYGLASSMTG

BUILT FOR TODAY'S PRIORITIES. DESIGNED
FOR TOMORROW'S POSSIBILITIES.

BUILD ONCE. SCALE FOREVER.

EMBEDDED EXPERTISE

We work with customers, not around them. Our consultants operate as extensions of client teams, combining strategic guidance, hands-on delivery and knowledge transfer.

PRACTICE LEADERSHIP

Dedicated leaders guide vision, standards, innovation and delivery quality so every engagement benefits from executive oversight and deep technical expertise.

LOOM ACCELERATOR

LOOM, the Large-Scale Optimized Orchestration Model, is Spyglass MTG's reusable Microsoft Fabric accelerator. It provides a configurable framework for provisioning, orchestrating, monitoring, and governing data pipelines.

THE FASTEST PATH TO IMPACT.

“

Fabric gives organizations the platform. LOOM gives them the accelerator. Together, through Fabric in 45 Days, we help clients establish a secure, governed, AI-ready data foundation that drives measurable business value from the very beginning.
