

THE GENIE ACCELERATOR SUITE

FROM UNSTRUCTURED INFORMATION **TO INTELLIGENT ACTION.**

Spyglass GENIE accelerators combine reusable AI patterns, Microsoft technologies, and hands-on engineering to help organizations transform complex information into secure, actionable intelligence. Start with a proven foundation, customize it around your business, and move from use case to production faster.

KNOWLEDGE IS EVERYWHERE. **ANSWERS ARE NOT.**

Organizations often struggle with:

- Information trapped across multiple systems
- Slow and inconsistent knowledge discovery
- Repetitive manual research and document review
- Difficulty scaling AI securely and responsibly
- AI initiatives that lack governance and business alignment

AI GENIE

Secure AI Application &
RAG Platform

DOCU GENIE

Document Intelligence
Accelerator

PATIENT INSIGHTS GENIE

Healthcare Record
Intelligence Accelerator

AI GENIE provides a repeatable framework for building secure, governed AI experiences that connect people to trusted information and business context.

WHAT AI GENIE DELIVERS:

UNLOCK KNOWLEDGE

Surface trusted information from enterprise documents, systems, and repositories.

ACCELERATE DEVELOPMENT

Start with proven frameworks instead of building every AI application from scratch.

GOVERN AI

Establish secure, scalable patterns that support responsible AI adoption.

SCALE INTELLIGENCE

Move from a single use case to a growing portfolio of AI-powered business solutions.

BUILT FOR THE AI FRONTIER

Whether you're analyzing thousands of documents, accelerating healthcare review processes, or creating entirely new AI-powered business experiences, AI GENIE provides the foundation to move from experimentation to production with greater speed, confidence, and control.

DON'T JUST ACCESS INFORMATION. PUT IT TO WORK.

TURN DOCUMENT COMPLEXITY INTO DECISION-READY INSIGHT

YOUR DOCUMENTS HOLD THE DETAILS.
DOCUGENIE TURNS THEM INTO DIRECTION.

INGEST

Connect documents from existing systems, repositories, and business workflows.

INTEGRATE

Deliver structured information into existing systems and workflows for reporting, review, and action.

ANALYZE

Apply Azure OpenAI to interpret extracted content and surface valuable insights.

EXTRACT

Identify and capture relevant information across multiple document types using Microsoft Document Intelligence.

SCALE

Introduce new document types and support increasing volumes through reusable prompt templates and scalable processing patterns.

BUILT AROUND YOUR BUSINESS

DocuGENIE is customized around the documents, workflows, and outcomes that matter to your organization. Spyglass combines the accelerator with hands-on consulting expertise to create a solution aligned to your specific use case, existing environment, and operational requirements.

USE CASES:

CONTRACT & POLICY ANALYSIS

Identify clauses, obligations, requirements, and relevant terms.

FINANCIAL & INSURANCE DOCUMENTS

Extract structured information from forms, statements, reports, and supporting records.

RESEARCH & TECHNICAL CONTENT

Surface relevant findings across extensive document collections.

COMPLIANCE & REGULATORY REVIEW

Locate critical information and support more consistent review processes.

THE DOCUGENIE ADVANTAGE

MORE THAN DOCUMENT PROCESSING.
DECISION INTELLIGENCE.

ACCELERATE REVIEW

Reduce the time required to find and analyze relevant information.

IMPROVE CONSISTENCY

Apply repeatable extraction and analysis patterns across document sets.

PROTECT SENSITIVE INFORMATION

Use Azure Key Vault, role-based access controls, and virtual networks to support secure document processing.

CONNECT TO EXISTING WORKFLOWS

Integrate document processing with current systems through Azure Data Factory.

FIND THE INSIGHT THAT MOVES PATIENT REVIEW FORWARD

PATIENT INSIGHTS
GENIE

Healthcare organizations are navigating growing volumes of medical records, clinical documentation, supporting evidence, and patient information. Critical findings can be buried across hundreds or thousands of pages, requiring highly skilled reviewers to spend valuable time searching instead of acting.

Patient Insights GENIE accelerates the identification, extraction, and analysis of relevant information across complex patient records, enabling faster review, greater consistency, and more efficient workflows.

YOUR DOCUMENTS HOLD THE DETAILS.
DOCUGENIE TURNS THEM INTO DIRECTION.

INGEST

Connect medical records, clinical documentation, supporting evidence, and patient information.

ANALYZE

Interpret extracted information and surface the insights reviewers need.

EXTRACT

Capture critical information using repeatable, AI-powered processing patterns.

IDENTIFY

Locate relevant findings across extensive and complex patient records.

INTEGRATE

Deliver structured findings into existing systems and review workflows.

BUILT AROUND YOUR USE CASES:

MEDICAL RECORD REVIEW

Surface relevant findings across extensive patient histories.

CLINICAL EVIDENCE REVIEW

Identify supporting documentation and critical clinical information.

PATIENT CASE ANALYSIS

Organize complex information into a more consistent review experience.

HEALTHCARE WORKFLOW INTEGRATION

Deliver structured insights into existing systems, databases, and reporting workflows.

LESS TIME
SEARCHING.
MORE TIME
MOVING

REVIEW
FORWARD.

THE PATIENT INSIGHTS GENIE ADVANTAGE

ACCELERATE REVIEW

Apply repeatable extraction and analysis patterns across patient records.

SUPPORT SECURE PROCESSING

Protect sensitive information through encryption, role-based access, and secure networking.

SCALE WITH DEMAND

Support growing record volumes through reusable and scalable processing patterns.

IMPROVE CONSISTENCY

Detect suspicious AI and agent activity, investigate threats, coordinate response, and support increasingly autonomous defense.

THE RIGHT INSIGHT CHANGES WHAT HAPPENS NEXT.

TRUSTED TO DELIVER. COMMITTED TO YOUR SUCCESS.

Spyglass GENIE accelerators turn complex, unstructured information into secure, actionable intelligence, helping organizations move from possibility to production with greater speed, confidence, and control.

“

Every organization is sitting on a wealth of knowledge. The challenge isn't finding more information. The challenge is transforming that information into intelligence people can trust and act upon. That's exactly why we created GENIE.

- IAN DICKER
CTO, Spyglass MTG

YOUR INFORMATION ALREADY HOLDS THE ANSWERS.
GENIE HELPS YOU PUT THEM TO WORK.
